

ILO says PH workers among world's lowest paid

By Cecilia D. Reyes

PH workers are among the lowest paid in the world, according to a new report by the International Labour Organization (ILO). The report, titled "World Employment Trends 2011," shows that the average monthly wage for full-time workers in the Philippines is just \$150, or about \$5 per day. This is significantly lower than the average of \$250 per month for workers in other developing countries. The ILO also found that the Philippines has one of the highest rates of informal employment in the world, with nearly 60 percent of the workforce working in the informal sector. This means that many workers do not have access to social security, minimum wage laws, or other labor protections. The report also highlights the need for better labor laws and enforcement to protect workers' rights and improve their living standards.

The ILO report also notes that the Philippines has a high rate of unemployment, particularly among young people. The unemployment rate for young people in the Philippines is nearly 20 percent, which is much higher than the global average of about 12 percent. This is a major concern for the country's future, as a large and unemployed youth population can lead to social and economic instability. The ILO calls for the government to take action to create more jobs and improve the quality of those jobs. It also emphasizes the importance of strengthening labor unions and ensuring that workers have a voice in their workplaces.

The report also discusses the impact of the global financial crisis on the Philippines. While the country's economy has shown some resilience, it has still experienced a significant increase in unemployment and a decline in real wages. The ILO notes that the crisis has led to a loss of social protection for many workers, particularly those in the informal sector. It calls for the government to implement policies that can help workers cope with the economic challenges they are facing. This includes providing social safety nets, such as unemployment benefits and food assistance, and promoting policies that can stimulate economic growth and create new jobs.

The ILO report also highlights the need for better labor laws and enforcement. It notes that many workers in the Philippines do not have access to minimum wage laws, overtime pay, or other labor protections. This is particularly true for workers in the informal sector, who often work long hours for low pay without any benefits. The ILO calls for the government to strengthen labor laws and ensure that they are properly enforced. It also emphasizes the importance of strengthening labor unions and ensuring that workers have a voice in their workplaces.

Noyoy mulling Melo successor

MANILA (AP) — President Benigno Aquino III is mulling over the possibility of naming Noyoy Binay as his successor, according to a source close to the president. The source said that the president is considering Binay because of his long record in public service and his popularity among the people. Binay has served as mayor of Manila for many years and has been a prominent figure in Philippine politics. The source also said that the president is still in the early stages of his decision-making process and that he will consult with other officials before making a final decision. The possibility of Binay becoming president has sparked speculation in the media and among the public. Some people believe that Binay is the best person for the job, while others believe that he is not qualified for the position. The president's decision will have a significant impact on the future of the Philippines.

Bishops: Spend money on food, fun alternatives, not on firecrackers

The Catholic bishops of the United States have urged Catholics to spend their money on food and fun alternatives instead of firecrackers. The bishops say that the New Year's Eve party season is a time when people are more likely to engage in risky behavior, such as drinking and driving.

A large pile of food, including fruit and vegetables. The Catholic bishops of the United States have urged Catholics to spend their money on food and fun alternatives instead of firecrackers.

Lessons from Rizal's life not lost on Pinoy youth

By Corina Cruz
Manila — The life of Jose Rizal, the national hero of the Philippines, is being rediscovered by a new generation of Pinoy youth. The Rizal Day celebration, held annually on June 19, is a time when the life and works of the hero are commemorated. This year, the celebration was held in a more meaningful way, with many young people participating in various activities that highlight the values and lessons of Rizal's life.

One of the most popular activities is the Rizal Day parade, where participants dress in traditional Filipino attire and carry banners that promote the values of Rizal's life. Many young people also participate in Rizal Day contests, which are held in schools and communities. These contests are a great way for young people to learn more about the life and works of Rizal, and to express their own views on the values and lessons of his life.

A group of young people participating in a Rizal Day parade, carrying a large banner that reads "RIZAL DAY".

Reporters' notebook
 The Rizal Day celebration is a time when the life and works of the national hero are commemorated. This year, the celebration was held in a more meaningful way, with many young people participating in various activities that highlight the values and lessons of Rizal's life.

Cruelest love of Rizal, the romance dominated his passion for women

Manila — The life of Jose Rizal, the national hero of the Philippines, is being rediscovered by a new generation of Pinoy youth. The Rizal Day celebration, held annually on June 19, is a time when the life and works of the hero are commemorated. This year, the celebration was held in a more meaningful way, with many young people participating in various activities that highlight the values and lessons of Rizal's life.

Portrait of a young woman, likely a participant in the Rizal Day celebration.

One of the most popular activities is the Rizal Day parade, where participants dress in traditional Filipino attire and carry banners that promote the values of Rizal's life. Many young people also participate in Rizal Day contests, which are held in schools and communities. These contests are a great way for young people to learn more about the life and works of Rizal, and to express their own views on the values and lessons of his life.

Chile's envoy discovered Rizal's greatness in Heidelberg

Manila — The life of Jose Rizal, the national hero of the Philippines, is being rediscovered by a new generation of Pinoy youth. The Rizal Day celebration, held annually on June 19, is a time when the life and works of the hero are commemorated. This year, the celebration was held in a more meaningful way, with many young people participating in various activities that highlight the values and lessons of Rizal's life.

Andy looks forward to brighter season

Andy Murray, 25, is looking forward to a brighter season after a disappointing start to his career. The Scottish tennis player, who won the Wimbledon title in 2007, is aiming to reach the top of the world rankings this year.

Murray's coach, Ivan Lendl, believes his player has the potential to become a world champion. Lendl, who has coached several Grand Slam winners, says Murray's return to the top of the sport is just a matter of time.

Ongkeko tops SM Bowling

Ongkeko, 32, has won the SM Bowling tournament, a major event in the sport. The player, who has been in the top 10 of the world rankings for several years, is looking forward to a successful season.

Ongkeko's victory was a surprise, as he was not expected to win. The player, who has been in the top 10 of the world rankings for several years, is looking forward to a successful season.

Former Asian sprint queen Mercado

Former Asian sprint queen Mercado rues being overlooked as coach

By [Name]

Mercado, 35, is looking forward to a brighter season after a disappointing start to his career. The former Asian sprint queen, who won the 100m title at the 1998 Asian Games, is aiming to reach the top of the world rankings this year.

Mercado's coach, Ivan Lendl, believes his player has the potential to become a world champion. Lendl, who has coached several Grand Slam winners, says Mercado's return to the top of the sport is just a matter of time.

Mercado's victory was a surprise, as he was not expected to win. The player, who has been in the top 10 of the world rankings for several years, is looking forward to a successful season.

PASAFERA

SMART

Figure 1 is a line graph showing the percentage of total protein in the supernatant versus the percentage of total protein in the pellet for various proteins. The y-axis is labeled "Protein (%)" and ranges from 0 to 100. The x-axis is labeled "Protein (%)" and ranges from 0 to 100. The legend indicates: Control (open circles), 100% (filled circles), 50% (open squares), 25% (filled triangles), and 12.5% (open diamonds). The graph shows that for most proteins, the percentage in the supernatant decreases as the percentage in the pellet increases. However, for some proteins, the percentage in the supernatant increases as the percentage in the pellet increases.

DOE invites firms to invest in natural gas projects

Six crucial infrastructure projects to require \$12.8B in capital

WASHINGTON, D.C. (AP) — The U.S. Department of Energy is seeking private investors to help build six crucial natural gas infrastructure projects that will require \$12.8 billion in capital.

The projects, which are part of the National Energy Infrastructure Program, include:

- 1. A new natural gas pipeline from the Gulf Coast to the Northeast.
- 2. A new natural gas pipeline from the Midwest to the Northeast.
- 3. A new natural gas pipeline from the Southwest to the Northeast.
- 4. A new natural gas pipeline from the West to the Northeast.
- 5. A new natural gas pipeline from the Midwest to the West.
- 6. A new natural gas pipeline from the Southwest to the West.

The DOE is currently accepting proposals from private firms to build these projects. The department is also seeking private investors to help finance the projects. The DOE is currently accepting proposals from private firms to build these projects. The department is also seeking private investors to help finance the projects.

Coffee industry seeks more govt help

WASHINGTON, D.C. (AP) — The National Coffee Association is asking the U.S. government for more help to promote coffee exports.

The NCA is currently seeking proposals from private firms to build new coffee processing facilities in the United States. The NCA is also seeking private investors to help finance the projects. The NCA is currently accepting proposals from private firms to build these projects. The department is also seeking private investors to help finance the projects.

Napacor seeks restructuring of \$4.4 loan from LBP

WASHINGTON, D.C. (AP) — Napacor is seeking to restructure a \$4.4 million loan from the Lebanese Bank of Paris (LBP).

Napacor is currently seeking proposals from private firms to build new power generation facilities in Lebanon. The company is also seeking private investors to help finance the projects. Napacor is currently accepting proposals from private firms to build these projects. The company is also seeking private investors to help finance the projects.

ENTERTAINMENT

Star Search & More

Read how the stars of the Philippines are making their mark in the entertainment industry. From the latest in show business to the latest in music, we have it all for you.

Cross-over at Acacia Cebu

Acacia Cebu, a popular shopping mall in Cebu, has recently opened its doors to a new era of entertainment. The mall has introduced a new concept called "Cross-over" which is a combination of shopping and entertainment. The mall has a large indoor arena where various shows and performances are held. The mall also has a large outdoor area where various activities and games are held. The mall is a great place to spend a day with your family and friends.

Some...

Example 1

Suppose \mathbf{A} is a 2×2 matrix with eigenvalues $\lambda_1 = 1$ and $\lambda_2 = 2$. Suppose \mathbf{v}_1 and \mathbf{v}_2 are eigenvectors corresponding to λ_1 and λ_2 , respectively. Suppose $\mathbf{v}_1 = \begin{pmatrix} 1 \\ 1 \end{pmatrix}$ and $\mathbf{v}_2 = \begin{pmatrix} 1 \\ 0 \end{pmatrix}$. Find \mathbf{A} .

Solution

Since \mathbf{v}_1 and \mathbf{v}_2 are eigenvectors of \mathbf{A} , we have $\mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1$ and $\mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2$. This gives us the system of equations

$$\begin{cases} \mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1 \\ \mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2 \end{cases} \Rightarrow \begin{cases} \mathbf{A}\begin{pmatrix} 1 \\ 1 \end{pmatrix} = 1\begin{pmatrix} 1 \\ 1 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 1 \\ 0 \end{pmatrix} = 2\begin{pmatrix} 1 \\ 0 \end{pmatrix} \end{cases}$$

Let $\mathbf{A} = \begin{pmatrix} a & b \\ c & d \end{pmatrix}$. Then the system of equations becomes

$$\begin{cases} \begin{pmatrix} a & b \\ c & d \end{pmatrix} \begin{pmatrix} 1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} a & b \\ c & d \end{pmatrix} \begin{pmatrix} 1 \\ 0 \end{pmatrix} = \begin{pmatrix} 2 \\ 0 \end{pmatrix} \end{cases} \Rightarrow \begin{cases} \begin{pmatrix} a+b \\ c+d \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} a \\ c \end{pmatrix} = \begin{pmatrix} 2 \\ 0 \end{pmatrix} \end{cases}$$

From the second system, we have $a = 2$ and $c = 0$. Substituting these values into the first system, we get

$$\begin{cases} \begin{pmatrix} 2+b \\ 0+d \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} 2 \\ d \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \end{cases} \Rightarrow \begin{cases} 2+b = 1 \\ d = 1 \end{cases} \Rightarrow \begin{cases} b = -1 \\ d = 1 \end{cases}$$

Therefore, the matrix \mathbf{A} is

$$\mathbf{A} = \begin{pmatrix} 2 & -1 \\ 0 & 1 \end{pmatrix}$$

Example 2

Suppose \mathbf{A} is a 3×3 matrix with eigenvalues $\lambda_1 = 1$, $\lambda_2 = 2$, and $\lambda_3 = 3$. Suppose \mathbf{v}_1 , \mathbf{v}_2 , and \mathbf{v}_3 are eigenvectors corresponding to λ_1 , λ_2 , and λ_3 , respectively. Suppose $\mathbf{v}_1 = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix}$, $\mathbf{v}_2 = \begin{pmatrix} 1 \\ 0 \\ 0 \end{pmatrix}$, and $\mathbf{v}_3 = \begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix}$. Find \mathbf{A} .

Solution

Since \mathbf{v}_1 , \mathbf{v}_2 , and \mathbf{v}_3 are eigenvectors of \mathbf{A} , we have $\mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1$, $\mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2$, and $\mathbf{A}\mathbf{v}_3 = \lambda_3\mathbf{v}_3$. This gives us the system of equations

$$\begin{cases} \mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1 \\ \mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2 \\ \mathbf{A}\mathbf{v}_3 = \lambda_3\mathbf{v}_3 \end{cases} \Rightarrow \begin{cases} \mathbf{A}\begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} = 1\begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 1 \\ 0 \\ 0 \end{pmatrix} = 2\begin{pmatrix} 1 \\ 0 \\ 0 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix} = 3\begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix} \end{cases}$$

Let $\mathbf{A} = \begin{pmatrix} a & b & c \\ d & e & f \\ g & h & i \end{pmatrix}$. Then the system of equations becomes

$$\begin{cases} \begin{pmatrix} a & b & c \\ d & e & f \\ g & h & i \end{pmatrix} \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} a & b & c \\ d & e & f \\ g & h & i \end{pmatrix} \begin{pmatrix} 1 \\ 0 \\ 0 \end{pmatrix} = \begin{pmatrix} 2 \\ 0 \\ 0 \end{pmatrix} \\ \begin{pmatrix} a & b & c \\ d & e & f \\ g & h & i \end{pmatrix} \begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix} = \begin{pmatrix} 0 \\ 3 \\ 0 \end{pmatrix} \end{cases}$$

From the second equation, we have $a = 2$ and $g = 0$. From the third equation, we have $b = 3$ and $h = 0$. Substituting these values into the first equation, we get

$$\begin{cases} \begin{pmatrix} 2 & 3 & c \\ d & e & f \\ 0 & 0 & i \end{pmatrix} \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} 2+3+c \\ d+e+f \\ i \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} 5+c \\ d+e+f \\ i \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \end{cases}$$

From the first equation, we have $5+c = 1$, $d+e+f = 1$, and $i = 1$. From the second equation, we have $d+e+f = 1$. From the third equation, we have $i = 1$. Therefore, the matrix \mathbf{A} is

$$\mathbf{A} = \begin{pmatrix} 2 & 3 & -4 \\ d & e & f \\ 0 & 0 & 1 \end{pmatrix}$$

where $d+e+f = 1$.

Example 3

Suppose \mathbf{A} is a 4×4 matrix with eigenvalues $\lambda_1 = 1$, $\lambda_2 = 2$, $\lambda_3 = 3$, and $\lambda_4 = 4$. Suppose \mathbf{v}_1 , \mathbf{v}_2 , \mathbf{v}_3 , and \mathbf{v}_4 are eigenvectors corresponding to λ_1 , λ_2 , λ_3 , and λ_4 , respectively. Suppose $\mathbf{v}_1 = \begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix}$, $\mathbf{v}_2 = \begin{pmatrix} 1 \\ 0 \\ 0 \\ 0 \end{pmatrix}$, $\mathbf{v}_3 = \begin{pmatrix} 0 \\ 1 \\ 0 \\ 0 \end{pmatrix}$, and $\mathbf{v}_4 = \begin{pmatrix} 0 \\ 0 \\ 1 \\ 0 \end{pmatrix}$. Find \mathbf{A} .

Solution

Since \mathbf{v}_1 , \mathbf{v}_2 , \mathbf{v}_3 , and \mathbf{v}_4 are eigenvectors of \mathbf{A} , we have $\mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1$, $\mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2$, $\mathbf{A}\mathbf{v}_3 = \lambda_3\mathbf{v}_3$, and $\mathbf{A}\mathbf{v}_4 = \lambda_4\mathbf{v}_4$. This gives us the system of equations

$$\begin{cases} \mathbf{A}\mathbf{v}_1 = \lambda_1\mathbf{v}_1 \\ \mathbf{A}\mathbf{v}_2 = \lambda_2\mathbf{v}_2 \\ \mathbf{A}\mathbf{v}_3 = \lambda_3\mathbf{v}_3 \\ \mathbf{A}\mathbf{v}_4 = \lambda_4\mathbf{v}_4 \end{cases} \Rightarrow \begin{cases} \mathbf{A}\begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix} = 1\begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 1 \\ 0 \\ 0 \\ 0 \end{pmatrix} = 2\begin{pmatrix} 1 \\ 0 \\ 0 \\ 0 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 0 \\ 1 \\ 0 \\ 0 \end{pmatrix} = 3\begin{pmatrix} 0 \\ 1 \\ 0 \\ 0 \end{pmatrix} \\ \mathbf{A}\begin{pmatrix} 0 \\ 0 \\ 1 \\ 0 \end{pmatrix} = 4\begin{pmatrix} 0 \\ 0 \\ 1 \\ 0 \end{pmatrix} \end{cases}$$

Let $\mathbf{A} = \begin{pmatrix} a & b & c & d \\ e & f & g & h \\ i & j & k & l \\ m & n & o & p \end{pmatrix}$. Then the system of equations becomes

$$\begin{cases} \begin{pmatrix} a & b & c & d \\ e & f & g & h \\ i & j & k & l \\ m & n & o & p \end{pmatrix} \begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix} \\ \begin{pmatrix} a & b & c & d \\ e & f & g & h \\ i & j & k & l \\ m & n & o & p \end{pmatrix} \begin{pmatrix} 1 \\ 0 \\ 0 \\ 0 \end{pmatrix} = \begin{pmatrix} 2 \\ 0 \\ 0 \\ 0 \end{pmatrix} \\ \begin{pmatrix} a & b & c & d \\ e & f & g & h \\ i & j & k & l \\ m & n & o & p \end{pmatrix} \begin{pmatrix} 0 \\ 1 \\ 0 \\ 0 \end{pmatrix} = \begin{pmatrix} 0 \\ 3 \\ 0 \\ 0 \end{pmatrix} \\ \begin{pmatrix} a & b & c & d \\ e & f & g & h \\ i & j & k & l \\ m & n & o & p \end{pmatrix} \begin{pmatrix} 0 \\ 0 \\ 1 \\ 0 \end{pmatrix} = \begin{pmatrix} 0 \\ 0 \\ 4 \\ 0 \end{pmatrix} \end{cases}$$

From the second equation, we have $a = 2$ and $m = 0$. From the third equation, we have $b = 3$ and $n = 0$. From the fourth equation, we have $c = 4$ and $o = 0$. Substituting these values into the first equation, we get

$$\begin{cases} \begin{pmatrix} 2 & 3 & 4 & d \\ e & f & g & h \\ i & j & k & l \\ 0 & 0 & 0 & p \end{pmatrix} \begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end{pmatrix} = \begin{pmatrix} 1 \\ 1 \\ 1 \\ 1 \end$$

Monitors

IBM Corp. has announced a new line of monitors for its personal computers. The new monitors are designed to be compatible with the IBM PC, XT, and AT series. They are available in 15-inch and 21-inch sizes. The 15-inch monitor is priced at \$199, and the 21-inch monitor is priced at \$299. Both monitors are available in monochrome and color versions. The 15-inch monitor is designed to be used with the IBM PC and XT series, while the 21-inch monitor is designed to be used with the IBM AT series. Both monitors are designed to be compatible with the IBM VGA and EGA video standards. The 15-inch monitor is designed to be used with the IBM PC and XT series, while the 21-inch monitor is designed to be used with the IBM AT series. Both monitors are designed to be compatible with the IBM VGA and EGA video standards.

Fluoride—The fluoride ion is a potent inhibitor of bacterial growth, and it is the basis of many dental treatments. Fluoride is found in toothpaste, mouthwash, and in some drinking water. It is also used in the treatment of osteoporosis and in the prevention of dental caries.
